## DETAILED ACTION

### 1. Restriction/Election

- A. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 16 and 19, drawn to a heptahelix receptor of SEQ ID NO:2, classified in class 530, subclass 350.
  - II. Claims 25 and 26, drawn to a method of lowering the level of active leukotriene B4 in a mammal by administering the protein of SEQ ID NO:2, classified in class 514, subclass 2.

- B. The inventions are distinct, each from each other because of the following reasons:

Inventions I and II are related as product and processes of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product, or (2) the product as claimed can be used in a materially different process of using that product MPEP § 806.05(h). In the instant case the protein can be used to produce an antibody.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter as defined by MPEP § 808.02, the Examiner has *prima facie* shown a serious burden of search (see MPEP § 803). Therefore, an initial requirement of restriction for examination purposes as indicated is proper.

- C. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR § 1.48(b) and by the fee required under 37 CFR § 1.17 (h).
